Acknowledgments:

Special "Thank You" goes to each of the following people and organizations for their generous support of our students and this project:

Mayor Richard K. Mavis has offered invaluable advice, direction, and support to our students and to this project in governmental and funding matters.

The Community Foundation of Mount Vernon & Knox County, whose dedication to the education of area students is a cornerstone of our community. The foundation provided a grant without which this project would not have been possible.

Janet Wacker, Reference Librarian at The Public Library of Mount Vernon & Knox County, who graciously offered hours of reference service to our students & their teachers.

Aubrey Brown, whose early help and direction informed the teachers, and in turn the students, as they developed this project.

Jim Gibson at The Knox County Historical Society Museum. Mr. Gibson provided opportunities for our students to view and photograph artifacts and original source material. This definitely enhanced the students' understanding and provided additional data for their research presentations.

Mr. Timothy Kahrl, a Faculty Emeritus, from The Ohio State University, kindly donated his time to edit the text our students wrote for walking tour signs. Mr. Kahrl's understanding of grammar, punctuation, tone, and style proved invaluable.

Mr. Skip Trask, who donated four days of his vacation time and his professional grade portable recording studio, to help the recording of our students' scripts be the best they could be.

A multitude of our students' parents, who chauffeured their children to libraries, museums, and private interviews; who also served as extra sets of eyes & ears for their child's script. A special thanks to those who went above and beyond, to help edit sign & script text of students other than their own.
